Advanced Classroom Lecture Capture

Universities are increasingly using live and on demand video to teach their students both on-campus and while away from campus. A high quality, easy-to-use video system is essential for professors to continue to deliver the highest quality learning experience. This is particularly important in advanced education scenarios where the professor may present slides, use a whiteboard, and conduct a demonstration all in the same session.

Lecture halls have complex A/V requirements. Panopto's integrated solutions work with your LMS and are designed with flexibility in mind, allowing for minimal cable runs and interchangeable hardware options to suit any budget or layout.

Your Complete Classroom Video Solution

Our technology and integration partners have developed hardware and software that integrates with Panopto. With Panopto as your video management system, here are the key components you'll need to assemble your complete classroom video solution.

∷Seneca Encoder

The **Seneca Scribe** is a purpose-built video capture appliance in a compact 1U short-depth form factor. Powered by the 8th generation Intel® Core ™ processor, Scribe combines performance and ease of use with a video capture appliance that can be installed anywhere; including A/V racks, desktops, and podiums. The Seneca Scribe and Scribe Lite hardware solutions are certified for performance and compatibility running Panopto.

Panasonic Camera

The **Panasonic 22x Zoom PTZ Camera** is ideal for classroom use and features a 1/2.3" sensor and outputs over HDMI or ethernet. Equipped with a 22x optical zoom, 30x iZoom, and 16x digital zoom, this PTZ camera enables ideal classroom lecture capture.

kaptivo Digital Whiteboard

Kaptivo attaches to the top of any whiteboard, automatically saving images and sharing content in real time to remote users. Kaptivo instantly enhances images to remove any reflections, glare, and people blocking the board. Whiteboard content can be streamed directly to any HDMI-capable input including video conference room systems, displays, projectors, or lecture capture systems.

WOLFVISION Document Camera

WolfVision's VZ-8 Series Visualizer systems are used in a large number of universities, schools and enterprises. The VZ-8 Series features a native 1080p HD camera and the new YSOP1 image processing engine. The VZ-8plus is the first Visualizer system with a frame rate of 60 fps at native 1080p HD resolution, allowing for smoother motion and faster autofocus than ever before.
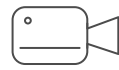

Panopto works with a number of industry leading AV partners, including these. See http://panopto.com/partners for more.

# Panopto is the Easy To Use Platform For All Your Video Content

Record

Easy-to-use software for Windows, Mac, and iOS. Record anything from a simple screencast to a multi-camera event.

Webcast

Live stream your presentation at the click of a button. Webcast to ten people across town or 10,000 around the world.

Search

Find any word spoken or shown on-screen in any video in your library. Panopto's search is the industry's best.

Manage

Manage and securely share videos across your organization. Centralize all of your video assets in a secure video library.

Upload

Panopto automatically converts your existing video files for playback on any device and makes them searchable.

Stream

Efficiently deliver video across your network and over the Internet to viewers worldwide.

Try Panopto free in your organization.
